### FOUNDER

Late Shri Piyarelall Agarwal the founder of the R.Piyarelall Group was a self-made man who started small but dreamt big. Hailing from Myanmar he was quick to gauge the shortfall between demand and supply of various commodities and started channelising agricultural produce of surplus countries into Indian market and gradually to other parts of the world. The Group owes its present growth to the extraordinary vision of its founder and continually endeavours to live up to his hopes for the future.

If one could go back in time, as far as history could take us, we would find that trading is how all that we know today as 'business' emerged. As providers of goods and services grew, so did competition. In order to survive and prosper, a trader needed to provide much more than just goods. It took business acumen to know where demand existed and which would be the most cost-efficient source that could meet this demand with quality supplies.

It was this proverbial eye for opportunities that saw Shri Piyarelall Agarwal make the first foray into the agro-trading business in Myanmar, way back in the middle of the 20th century. Commencing operations with the export of surplus foodgrain production and the trading of textiles, the business gradually diversified into the then underdeveloped market of commodity trading. The R.Piyarelall Group formally began operations as an incorporated body in India in 1981. From its modest beginning in 1981, in just over two and half decades, the Group turnover crossed the 6000 million mark maintaining the growth curve on not just its import-business, but in all spheres of its activities - from exports to logistics and manufacturing. Today Late Piyarelallji Agarwal would have been proud to see R.Piyarelall Group of Companies, that he founded grown and spread over its worldwide network of business associates, ... striving to build new and stronger bridges ... connecting supply to demand.

Today, R. Piyarelall Group is a leading business conglomerate, which in addition to its flagship merchant Impex business and manufacturing exports, has diversified its activities into large scale basic industries and creation of infrastructure, shipping, logistics control, warehousing and real estate business. The group abides by the basic tenets of manufacturing, processing and trading business, as laid down by its founding father - that of adherence to strict quality control, commitment to schedule and building on goodwill. The current turn over of the Company for the year ended 31.03.2007 stands at US \$ 200 million i.e. 100% increase over the previous year. The Company also owns a fleet of two brand new Self-propelled barges with a total capacity of approx. 6000 MT.
